

1. Finn frem batteriet

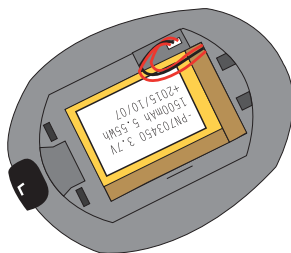

2. Plugg i kontakten

3. Sett i batteriet i front (holdt fra deg) først.

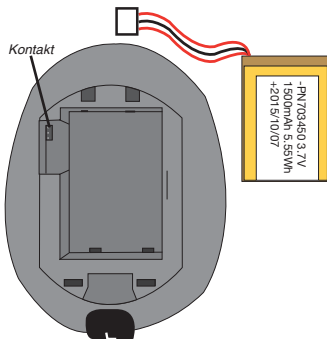

4. Trykk bakenden forsiktig ned i batterikammeret og legg ledningene forsiktig ned. Sett på lokket.

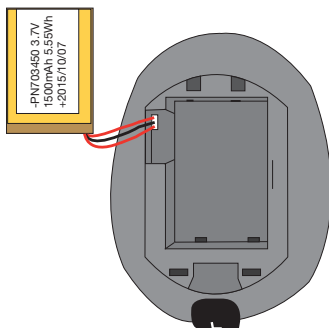

PS. Teksten på batteriet er kun for illustrasjon. OBS! Batteriet må lades når strømnivået når 20%.

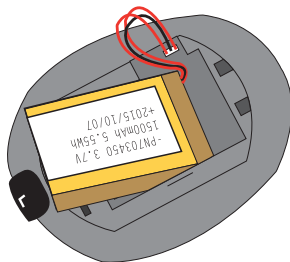

1. Find the battery

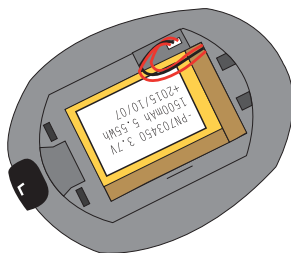

2. Plug the battery into the socket

3. Insert the battery in the front first.

4. Press the rear end of the battery gently into the chamber and put the wires gently over it. Put on the lid.

PS. The text on the battery is only for illustration. NB! The battery must be recharged when the power level reaches 20%.
