

FT-265 LED

LICENSE PLATE FRAME WITH LED LIGHTING

Universal license plate frame.

Designed for wide application – suitable for passenger cars, vans, trucks, trailers, recovery vehicles, agricultural machinery, and even bicycle racks.

The frame with integrated license plate lighting is easy to install.

The rear latch allows effortless license plate replacement.

An ideal solution for trailer, semi-trailer, and recovery vehicle manufacturers.

Thanks to our solution, you save both time and money.

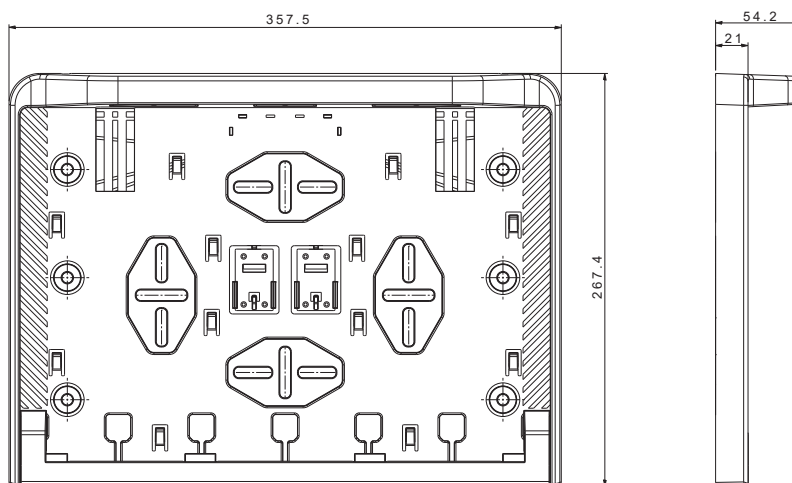

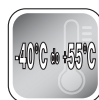

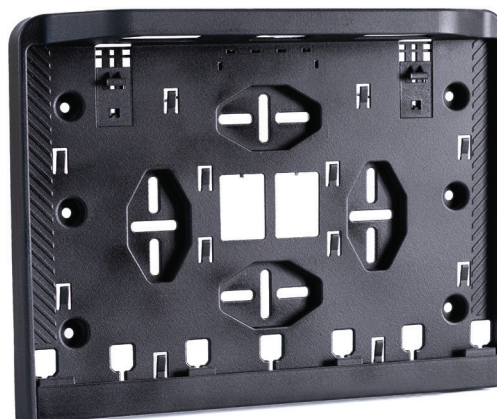

The built-in LEDs not only illuminate the license plate in compliance with regulations but also significantly improve visibility during night driving.

Key product features:

- Universal application
- Integrated LED lighting
- High brightness
- Easy installation
- Durable material

Power consumption: $12V/24V = 0.1A/0.05A$

Power consumption / Rated power: $12V/24V = 1.2W/1.2W$
