- Proper installation of this product requires the installer to have a good understanding of automotive electronics, systems and procedures.
- Failure to use specified installation parts or hardware will void the product warranty.

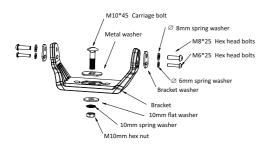

- For this product to operate at optimum efficiency, a good electrical connection to chassis ground must be made.
- It is recommend that these instructions be stored in a safe place and referred to when performing maintenance or reinstallation of this products.
- Do not install and/or operate this safety product unless you have read and understand the safety information contained in this manual.

Important! This unit is a safety device, and it must be connected to its own separate, fused power point to assure its continued operation should any other electrical accessory fail.

This document provides all the necessary information to allow your product to be properly and safely installed. Before beginning the installation and operation of your new product, the installation technician and operator must read this manual completely.

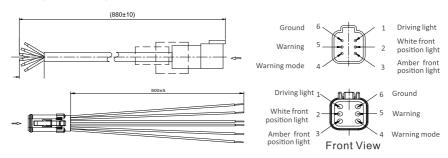

Mounting:

- Choose a solid surface on the vehicle or bullbar to mount the driving lamp.
- 2.Read the safety note before installing the products. Verify that all power supply comply to the specified voltage limits for the light.
- 3. Verify that all parts listed under "In the Box" are present and complete.
