This document provides all the necessary information to allow your product to be properly and safely installed. Before beginning the installation and operation of your new product, the installation technician and operator must read this manual completely.

Remote Control Instruction Manual

This manual describes how to use the remote search light.

In this manual you will learn about:

1. Basic function of the remote control;
2. Connect the light to remote control.

Basic functions

Only on condition that the light is connected to remote controller, it can be remote controlled.

On: Press to turn on the light

Off: Press again to turn off the lights and reset

Up: Head up

Down: Head down

Left : Turn left

Right: Turn right

Spot: Spot and short/long press can adjust the beam

Flood: Flood and short/long press can adjust the beam

Speed/Flash: Default the fast speed. Press one time to adjust the speed. Long press change to SOS

Connect the light

Factory setting has been coded.

Disconnect the light

If you find the remote control is not matching the light , please do the following:

1. Press the Spot key and the Speed / Flash key at the same time for 5 seconds when power supply connected.(Picture 1)
2. If the light flashes, the coding is successful; otherwise, the coding fails.
3. If the coding fails, the power must be turned on again, and repeat above operation.

Code Matching
